

# SHARVARI NILESH DHEKRE

Mumbai, Maharashtra

sharvaridhekre05@gmail.com | +91-9356784702 | linkedin.com/in/sharvari-dhekre | github.com/Sharvarid03

## PROFILE

Information Technology undergraduate with a strong academic record and hands-on experience designing, building, and deploying full-stack applications. Notable work includes an end-to-end Retrieval-Augmented Generation platform for financial document analysis, combining semantic chunking, embeddings, vector search, and LLM-based report generation, as well as a YOLOv5-based computer vision system for traffic management. Solid fundamentals in data structures, databases, and web development, with leadership experience through the IEEE UNIT Council.

## EDUCATION

### B.Tech in Information Technology

Usha Mittal Institute of Technology, SNDT Women's University, Mumbai

September 2024 – Present

**CGPA: 8.25**

### Diploma in Computer Engineering

Bajaj Polytechnic, Chandrapur, MSBTE Board

September 2021 – June 2024

**93.88 percent — 4th Rank**

### Class X, CBSE

BJM Carmel Academy, Chandrapur

August 2021

**84.20 percent**

## TECHNICAL SKILLS

**Languages:** Python, C, C++, Java, JavaScript, SQL

**AI/ML Tools :** Retrieval-Augmented Generation, LLM APIs, Groq, Embeddings, FAISS Vector Search, Prompt Engineering, OpenCV, YOLOv5

**Web and Backend:** Streamlit, Flask, HTML, CSS, JavaScript, Bootstrap, Node.js and Express.js Basics

**Databases and Tools:** SQLite, MySQL, GitHub, Hugging Face Spaces, VS Code, LaTeX, Figma

**Core CS:** Fundamentals of Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems Fundamentals

## PROJECTS

### LedgerLens – AI-Powered Financial Document Analysis Platform

2026

*Python, FAISS, sentence-transformers, Groq LLM API, SQLite, Streamlit*

Live Demo | GitHub

- Built and deployed an end-to-end Retrieval-Augmented Generation platform that analyzes financial documents such as annual reports, audit reports, and balance sheets, producing structured, source-grounded reports.
- Designed the RAG pipeline: PDF parsing and semantic chunking, sentence-transformer embeddings, FAISS-based vector retrieval, and LLM-based report generation with inline source citations.
- Generated multi-section reports covering executive summary, financial health, risk assessment, compliance review, investment memo, and follow-up questions.
- Built supporting product features including user authentication, project workspaces, saved report history, and editable/downloadable PDF and TXT reports, and deployed the platform on Hugging Face Spaces.

### TRAFFIX – AI-Driven Traffic Signal Management System

*Python, OpenCV, YOLOv5, Flask*

GitHub

- Built a computer vision pipeline using the YOLOv5 object detection model to detect and count vehicles from traffic camera footage.
- Estimated lane-wise vehicle density from video feeds to support dynamic signal-timing adjustments.
- Designed an emergency-vehicle priority detection feature aimed at reducing ambulance wait times at signals.
- Used Flask to serve the detection pipeline and OpenCV for video frame processing.

### Staccato – Music Streaming Website

*HTML5, CSS3, JavaScript*

Diploma Team Project

Live Demo | GitHub

- Built a responsive front-end music streaming website with multiple pages, song sections, and JavaScript-based interactivity.
- Contributed to UI layout, visual styling, and cross-device responsiveness as part of a team project.
- Deployed the project using GitHub Pages and maintained it through Git version control.

## EXPERIENCE

### Research and Development Intern, Indian Space Lab

December 2025

- Learned the fundamentals of Google Earth Engine for geospatial data analysis and visualization.
- Explored drone technologies, remote sensing concepts, and their real-world applications.
- Worked with satellite imagery datasets and gained exposure to research-oriented problem solving.

### Frontend Development Intern, Fast Tech Software Services

June 2023 – August 2023

- Developed responsive web pages using HTML, CSS, and JavaScript.
- Converted Figma designs into functional frontend interfaces.

- Gained exposure to Git and GitHub-based collaboration workflows.

## POSITIONS OF RESPONSIBILITY AND ACHIEVEMENTS

---

- **Creative and Social Media Head, IEEE UMIT Council:** Managed digital promotion, creative design, social media communication, and event visibility for technical activities.
- **Hackathon Organizer:** Coordinated teams, schedules, and logistics for a 24-hour technical hackathon.
- **Project Lead, Smart India Hackathon 2025 Internal Round:** Led project coordination and presentation preparation for the internal round.
- **Academic Ranker:** Secured 4th Rank across college and district board during Diploma in Computer Engineering.
- **Class Representative:** Elected for 3 consecutive years to manage student-faculty communication.

## RELEVANT COURSEWORK

---

Machine Learning Fundamentals, Probability and Statistics, Linear Algebra, Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming, Software Engineering
